

**2019 Patient Centered Medical Home**  
**Quality Metrics for Family Practices**

Core Metric	Description	Threshold
<b>1. Antidepressant medication management (adults only)- Effective continuation phase</b>	Percentage of members 18 and older who were treated with antidepressant medication, had a diagnosis of major depression, and who remained on an antidepressant medication for at least 180 days (6 months)	≥40%
<b>2. Asthma medication ratio</b>	The percentage of members 5–64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.50 or greater during the measurement year	≥81%
<b>3. BMI composite</b>	-	-
<ul style="list-style-type: none"> <li>Adult BMI assessment</li> </ul>	Percentage of members 18-74 years of age who had an outpatient visit and whose body mass index (BMI) was documented during the measurement year or the year prior to the measurement year	≥83%
<ul style="list-style-type: none"> <li>Weight assessment and counseling for nutrition for children/adolescents- BMI percentile</li> </ul>	Weight assessment and counseling for children/adolescents ages 3-17, defined as: percentage of members who had an outpatient visit with a PCP or OB/GYN and whose body mass index (BMI) was documented during the measurement year	≥66%
<b>4. Childhood immunizations- Combination 10</b>	Percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday.	≥42%
<b>5. Comprehensive Diabetes Care: BP control (&lt;140/90 mmHg)</b>	Percentage of members 18-75 years of age with diabetes (type 1 and type 2) whose most recent blood pressure reading is less than 140/90 mm Hg (controlled)	≥56%
<b>6. Comprehensive Diabetes Care: eye exam (retinal) performed</b>	Percentage of members 18-75 years of age with diabetes (type 1 and type 2) who had an eye exam (retinal) performed	≥51%
<b>7. Comprehensive Diabetes Care: HbA1c poor control (&gt;9.0%)</b>	Percentage of members 18-75 years of age with diabetes (type 1 and type 2) with most recent HbA1c level during the measurement year greater than 9.0%	≤47%
<b>8. EPSDT (composite for older kids)</b>	-	-
<ul style="list-style-type: none"> <li>EPSDT: Well-child visits ages</li> </ul>	Percentage of members 7-11 years of age who had one or	≥55%

7-11 years	more well-child visits with a PCP during the measurement year	
<ul style="list-style-type: none"> <li>• EPSDT: Adolescent well-care visits age 12-21</li> </ul>	Percentage of members 12-21 years of age who had at least one comprehensive well-care visit with a PCP or OB/GYN during the measurement year	≥47%
<b>9. EPSDT (Composite for younger kids)</b>	-	-
<ul style="list-style-type: none"> <li>• EPSDT: Well-child visits first 15 months – 6 or more visits</li> </ul>	Percentage of members who turned 15 months of age during the measurement year and who had 6+ well-child visits with a PCP during their first 15 months of life	≥61%
<ul style="list-style-type: none"> <li>• EPSDT: Well-child visits at 18, 24, &amp; 30 months</li> </ul>	<p>The percentage of members who turned 35 months old during the measurement timeframe who had at least one well-child visit within each of the following intervals:</p> <ul style="list-style-type: none"> <li>• 2 weeks before 18 month up to 2 weeks before 24 months</li> <li>• 2 weeks before 24 month up to 2 weeks before 30 months</li> <li>• 2 weeks before 30 month up to 35 months</li> </ul> <p>Total: at least one visit during each of the three intervals above</p>	≥34%
<ul style="list-style-type: none"> <li>• EPSDT: Well-child visits ages 3-6 years</li> </ul>	Percentage of members 3-6 years of age who had one or more well-child visits with a PCP during the measurement year	≥69%
<b>10. Immunizations for adolescents-Combination 2</b>	Percentage of adolescents 13 years of age who had one dose of meningococcal conjugate vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine, and have completed the human papillomavirus (HPV) vaccine by their 13th birthday	≥26%
